

INTERNATIONAL ACCREDITATION SYSTEM FOR
INTERVENTIONAL ONCOLOGY SERVICES

About IASIOS

Interventional oncology (IO) is a discipline that has expanded dramatically over the past few decades and now plays an ever-increasing and important role in the management of cancer patients. It offers minimally invasive treatment options that enable the safe and effective clinical management of patients.

CIRSE Standards of Quality Assurance in IO focuses on interventional procedures involved in the management of cancer patients. They look at the whole process of patient care and treatment and what is required to deliver it safely and effectively.

IASIOS is an international accreditation system that offers facilities a unique opportunity to achieve a seal of quality and recognition for its interventional oncology services performed according to the CIRSE Standards of Quality in IO.

Key Objectives

- Set Standards
- Facilitate Change
- Create Awareness

...in Interventional Oncology practice

IASIOS accreditation:

- ✓ Certifies better patient care
- ✓ Offers quantifiable benchmarks
- ✓ Supports the development of Interventional Oncology
- ✓ Creates further career opportunities for Interventional Oncologists

The Application Process

Step 1:
Facility registers

Step 2:
Facility becomes IASIOS Enrolled Centre

Step 3:
Facility submits application

Step 4:
Application is reviewed

Step 5:
Accreditation granted

Step 6:
Re-certification or application for Centre of Excellence

- Enrolled Facilities will receive an application package containing all forms required for submission. Guidance will be available if required.
- Applications are reviewed by reputable IOs in a transparent and standardised manner
- Accreditation will be granted for 4 years. At the end of this period, Accredited Facilities may be re-certified or qualify for the Centre of Excellence status by submitting additional evidence of good practice and quality of IO services

Why apply?

- Showcase your achievements
- Gain recognition
- Support the development of Interventional Oncology

Who can apply?

- Any medical facility at which interventional oncology is planned and/or delivered

Are there any requirements regarding geographic location or size?

- No, IASIOS is a global initiative and facilities can apply regardless of their location or size.

In 2018, IASIOS is running a **pilot accreditation round** for selected hospitals only. For more information on the official launch and early registration please contact us at
